

WE HELP
YOU HEAL

Our Team Makes the Difference

Our wound care team has a true passion for helping patients heal.

A wound center can provide the specialized treatment options and medical expertise needed to support the body's healing process - a key element being the wound center staff.

Our wound center is staffed by highly skilled clinicians who are dedicated to wound care. They have a true passion for healing wounds, undergoing extensive training in wound care to receive the tools necessary to create a personalized treatment plan for each patient.

Patients coming into the center develop close relationships with the staff. Our wound center team supports them every step of the way, encouraging patients to follow their care plans, while helping them focus on their progress.

Patients can rest assured that our compassionate, dedicated staff will provide the best specialized care for their needs.

We treat wounds of all types, including:

- + Diabetic foot ulcers
- + Venous ulcers
- + Pressure injuries/ulcers
- + Non-healing, post-surgical wounds
- + Traumatic wounds
- + Arterial/ischemic ulcers
- + Compromised skin grafts and flaps
- + Any wound that is not healing or is of concern, such as wounds associated with radiation, osteomyelitis or crush injuries
